

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

Application of Southern California Edison Company (U 338-E) for Authorization: (1) to Replace San Onofre Nuclear Generating Station Unit Nos. 2 & 3 (SONGS 2 & 3) Steam Generators; (2) Establish Ratemaking for Cost Recovery; and (3) Address Other Related Steam Generator Replacement Issues.

Application 04-02-026
(Filed February 27, 2004)

**ADMINISTRATIVE LAW JUDGE'S RULING
REQUIRING PROVISION OF TUBE DEGRADATION RESULTS**

During the course of the evidentiary hearings, Southern California Edison Company (SCE) indicated that the Dominion Engineering Incorporated (DEI) statistical analysis of the tube degradation results of the last refueling outage for San Onofre Nuclear Generating Station Unit 3 would be available in May. Likewise, the results for Unit 2's most recent refueling outage were previously prepared. These results are relevant to the determination of the cost-effectiveness of the steam generator replacement program addressed in this application. Therefore, I require SCE to provide the results of the DEI analyses of Units 2 and 3, without adjustment by SCE, in the form of graphs comparable to Figure II-6 and Figure II-7 in Exhibit SCE-2. The results should also be shown in tabular form. The response to this ruling will be in the form of a compliance filing.

I plan to enter the compliance filing into the record as an exhibit. There should be no objection to the receipt of this exhibit into evidence since it would

be essentially an update of an existing exhibit, and would exclude any adjustments of the results by SCE. However, parties will be allowed to review the compliance filing and workpapers, if any, and object or comment as they see fit.

Therefore, **IT IS RULED** that:

1. Southern California Edison Company (SCE) shall provide the results of the Dominion Engineering Incorporated statistical analyses of the last refueling outages for San Onofre Nuclear Generating Station Units 2 and 3, without adjustment by SCE, in the form of graphs comparable to Figure II-6 and Figure II-7 in Exhibit SCE-2. The results should also be shown in tabular form.
2. The response to this ruling shall be in the form of a compliance filing.
3. Workpapers, if any, shall be provided to the parties upon request.
4. The response shall be filed and served on all parties as soon as it is available, but in any case no later than May 27, 2005.
5. Parties may file a response to the compliance filing no later than ten days after the compliance filing is filed.
6. Any party objecting to the receipt of the compliance filing into evidence shall make and explain its objection in its response.

Dated April 29, 2005, at San Francisco, California.
